PURE COMFORT TROWEL

Quality, ergonomics and innovation are important incentives for **Super Prof**. We like to respond to the wishes and needs of professionals. With the introduction of the new Super Prof Pure **COMFORT** finishing and plastering trowels, we can proudly say this mission has once again been successful. A real **GAME CHANGER** when it comes to design and styling.

The innovative **comfortable hand grip** with finger protection is made from our well-known **Pure leather hand grip**, which absorbs moisture better. The new ergonomic shape of the hand grip allows the position of the hand to vary better on the hand grip. This gives a better grip and optimises the pressure point on the trowel, which gives a comfortable and flexible operating sensation and promotes working comfort.

In addition to design, styling and comfort, sustainability is an important aspect in the development of the **COMFORT** trowels. The aluminium bracket has been replaced with a light **Carbon bracket**. Instead of welding the aluminium bracket, the **Carbon bracket** is glued. The gluing ensures a rock-solid connection and maximum stability.

Focusing on the intended target group, plasterers, training centres and producers of plasters/mortars have intensively tested the **COMFORT** trowels. Not only did we receive positive reactions, but also interesting insights from practice. Based on this data, the trowel is equipped with a **stainless steel blade**, available in **4 different blade thicknesses: 0.3mm - 0.4mm - 0.5mm - 0.7mm**.

Depending on the type of material being processed and its application, a distinction can be made in blade thicknesses.

PURE

STAIN LESS

CARBON FIBRE

FINISHING TROWEL FLEX

APPLICATION
- Blade with rounded corners
- **Very easy** to handle
- **Very easy** to process
- Stucco effects easily applied
- Little friction from the base layer
- Super-smooth finish

MATERIAL PROCESSING
- Decorative plasters
- Gloss plasters
- Thin plasters
- Façades
- Marble plasters

0.3 mm

FINISHING TROWEL FLEX

APPLICATION
- Blade with rounded corners
- **Very easy** to handle
- **Very easy** to process
- Moves very easily
- Little control required from the wrist
- Good pressure distribution on all corners and length of the blade

MATERIAL PROCESSING
- Gypsum and Spack
- Hand plasters
- Decorative plasters
- Concrete ciré products
- Micro-cement

0.4 mm

FINISHING TROWEL

APPLICATION
- **Easy** to handle
- **Easy** to process
- Quickly and naturally puts the required shape in the blade
- Good pressure distribution on both the left and right side of the blade
- Instant smooth first layer when applying material

MATERIAL PROCESSING
- Gypsum and Spack
- Cement-bound mortars
- Stucco mortar
- Insulation mortar
- Hand plasters
- Decorative plasters
- Concrete ciré products

0.5 mm

PLASTERING TROWEL

APPLICATION
- **Easy** to handle
- **Normal** processing
- Sturdy construction
- Material easy to apply

MATERIAL PROCESSING
- Gypsum and Spack
- Cement-bound mortars
- Stucco mortar
- Insulation mortar

0.7 mm
