

SUPERPROF

**LEATHER
HANDGRIP**

**TOOLS FOR
PROFESSIONALS**

www.superprof.nl

The Pure concept of Super Prof consists of a full range of plastering trowels, finishing trowels, brick-trowels, plastering spatulas, finishing spatulas and tile adhesive trowels

The Pure concept of Super Prof is equipped with an ergonomic leather handgrip, which gives a good grip and absorbs the moisture better. This improves work comfort and productivity.

ONLINE CHANNELS

The Super Prof online product catalog can be visited on your mobile, tablet, laptop or PC. Here we offer the possibility to search directly within the following target groups: plasterers, tilers, bricklayers, jointers, dry builders, gibo builders, floor layers and painters. You can also search within one of the 28 product categories.

If you are looking for a specific product, then it is possible to search by item number and by product name.

We can also be found online on our social media channels.

PURE TILE ADHESIVE TROWELS

The best option for gluing tiles are the Pure tile adhesive trowels with a leather handle. These are equipped with a hardened and specially polished stainless steel blade. Thanks to the strong and light aluminum mounting, it is a comfortable trowel that is reliable to work with. The Pure adhesive trowels are available in various toothings. This way you can choose from a triangular-, straight-, semicircular- or slanted toothing.

TRIANGULAR TOOTHING

STRAIGHT TOOTHING

SEMICIRCULAR TOOTHING

FLOWLINE SLANTED TOOTHING

SUPER PROF PURE FLOWLINE TILE ADHESIVE TROWEL

Within the Pure tile adhesive trowel range there is the de Flowline tile adhesive trowel. The slanting toothing of the Pure Flowline creates a practically full bed of adhesion. The glue grooves fall over each other, so there is no hollow space under the tiles and less glue is needed.

Available in 6, 8 en 10 mm toothings.

PURE FINISHING TROWELS

The Pure finishing trowels have a leather handle that is attached on the blade with a strong and lightweight aluminum mounting. The hardened and specially polished stainless steel blade is resistant to aggressive materials. Our Pure finishing trowels are available in 4 different variants to meet all common plaster work.

Has a ergonomic leather handle, which absorbs the moisture better. Works more comfortably and also less stressful for muscles and joints.

Especially for difficult to reach surfaces, because of the leather handle that is placed on the back of the blade.

The curved blade automatically applies the right amount of material over the seams of the plasterboard sheets.

FLEX

0,3 MM - 0,4 MM

SUPER PROF PURE FLEX FINISHING TROWEL

The Flex finishing trowel distinguishes itself by the thinner blade that is available in 2 thicknesses (0,3 mm - 0,4 mm). This makes the Flex ideal for super smooth finishing of skimming plaster on (large) surfaces, quickly and without loss of plaster material. It is almost not necessary to sand later. Suitable for all types of concrete look stucco.

Available in different lengths (280 and 330 mm).

PURE BRICK TROWELS

To complete the Super Prof Pure concept, the brick trowels are also available with an ergonomic leather handle.

The leather handle with finger protection has a fully welded connection on the robust steel blade with a sharpened edge. This guarantees a very strong and durable connection. Because of the sanded surface of the blade, the material stays better on the trowel.

The Pure brick trowels are available in various shapes and sizes. You will find the following models within the Pure concept: SMART, Floreffe, Brussels, Antwerp, Paris and Charleroi. Right and left handed people has been taken into account.

TOOLS FOR PROFESSIONALS

Leather handgrip

Finger protection

Fully welded

Robust steel blade with a sharpened edge

PURE PLASTERING & FINISHING SPATULAS

The Pure finishing- and plastering spatula are equipped with a aluminum holder that guarantees that the stainless steel blade remains straight. They also have a leather grip that absorbs the moisture better.

Available in different widths (except for notched plastering spatula):
170 - 220 - 285 - 380 - 480 - 570 mm

PURE FINISHING SPATULAS

Made for cutting plasters. These Pure finishing spatulas have a blade thickness of 0,4 mm.

PURE PLASTERING SPATULAS

The Pure plastering spatulas have a blade thickness of 0,7 mm especially for gypsum plasters.

PURE PLASTERING SPATULA - NOTCHED

For roughening the first layer of gypsum plaster and removing air bubbles from leveling floors. Equipped with a 0.7 mm thick blade and a width of 480 mm.

WOODEN TOOLBOX WITH 5 PURE FINISHING SPATULAS

The Super Prof wooden toolbox ensures that your Pure spatulas can be stored and transported safely and professionally.

ECO PURE PLASTERERS TROWELS

The Eco range is characterized by an excellent price-quality ratio. By using different materials and production techniques, this range offers products in the lower price segment while still meeting the quality standards of professional craftsmen.

The Super Prof Eco Pure plasterers trowels are also equipped with a leather handle with finger protection. The stainless steel blade is attached using a spot-welded connection.

SUPERPROF

PURE COMFORT TROWEL

Quality, ergonomics and innovation are important incentives for **Super Prof**. We like to respond to the wishes and needs of professionals. With the introduction of the new Super Prof Pure **COMFORT** finishing and plastering trowels, we can proudly say this mission has once again been successful. A real **GAME CHANGER** when it comes to design and styling.

The innovative **comfortable hand grip** with finger protection is made from our well-known **Pure leather hand grip**, which absorbs moisture better.

The new ergonomic shape of the hand grip allows the position of the hand to vary better on the hand grip. This gives a better grip and optimises the pressure point on the trowel, which gives a comfortable and flexible operating sensation and promotes working comfort.

In addition to design, styling and comfort, sustainability is an important aspect in the development of the **COMFORT** trowels. The aluminium bracket has been replaced with a light **Carbon bracket**. Instead of welding the aluminium bracket, the **Carbon bracket** is glued. The gluing ensures a rock-solid connection and maximum stability.

Focusing on the intended target group, plasterers, training centres and producers of plasters/mortars have intensively tested the **COMFORT** trowels.

Not only did we receive positive reactions, but also interesting insights from practice.

Based on this data, the trowel is equipped with a **stainless steel blade**, available in **4 different blade thicknesses: 0.3mm - 0.4mm - 0.5mm - 0.7mm**.

Depending on the type of material being processed and its application, a distinction can be made in blade thicknesses.

FINISHING TROWEL FLEX

APPLICATION

- Blade with rounded corners
- **Very easy** to handle
- **Very easy** to process
- Stucco effects easily applied
- Little friction from the base layer
- Super-smooth finish

MATERIAL PROCESSING

- Decorative plasters
- Gloss plasters
- Thin plasters
- Façades
- Marble plasters

0.3 mm

FINISHING TROWEL FLEX

APPLICATION

- Blade with rounded corners
- **Very easy** to handle
- **Very easy** to process
- Moves very easily
- Little control required from the wrist
- Good pressure distribution on all corners and length of the blade

MATERIAL PROCESSING

- Gypsum and Spack
- Hand plasters
- Decorative plasters
- Concrete ciré products
- Micro-cement

0.4 mm

FINISHING TROWEL

APPLICATION

- **Easy** to handle
- **Easy** to process
- Quickly and naturally puts the required shape in the blade
- Good pressure distribution on both the left and right side of the blade
- Instant smooth first layer when applying material

MATERIAL PROCESSING

- Gypsum and Spack
- Cement-bound mortars
- Stucco mortar
- Insulation mortar
- Hand plasters
- Decorative plasters
- Concrete ciré products

0.5 mm

PLASTERING TROWEL
