

# STORE CONCEPTS

TOOLS FOR  
PROFESSIONALS

For more than 50 years Super Prof has been successful in developing, producing and selling hand tools and construction related products.

Super Prof is a unique, strong brand which stands for a complete, innovative and ergonomic range of high quality professional tools.

We are very excited to show you our various store concepts that we offer for numerous professional target groups such as tilers, plasterers, bricklayers, drywallers, gypsum block constructors, painters, floor layers and brick jointers.

**Team Super Prof**

## PURE - LEATHER HANDGRIP

Within our store concepts you can find the leather **Pure** line of Super Prof that consists of a full range of plastering trowels, finishing trowels, plastering spatulas, finishing spatulas, bricktrowels and tile adhesive trowels.

The Pure concept of Super Prof is equipped with an ergonomic leather handgrip, which gives a good grip and absorbs the moisture better. This improves work comfort and productivity.

# LEATHER HANDGRIP

# PURE COMFORT TROWEL

The Super Prof Pure **COMFORT** finishing and plastering trowels are a real **GAME CHANGER** when it comes to design, quality and ergonomic innovations.

The innovative **comfortable hand grip** with finger protection is made of our well-known **Pure leather hand grip**, which absorbs moisture better.

The new ergonomic shape of the hand grip allows the position of the hand to vary better on the hand grip. This gives a better grip and optimises the pressure point on the trowel, which gives a comfortable and flexible operating sensation and promotes working comfort.

In addition to design, styling and comfort, sustainability is an important aspect in the development of the **COMFORT** trowels. The aluminium bracket has been replaced with a light **Carbon bracket**. Instead of welding the aluminium bracket, the **Carbon bracket** is glued. The gluing ensures a rock-solid connection and maximum stability.

Focusing on the intended target group, plasterers, training centres and producers of plasters/mortars have intensively tested the **COMFORT** trowels.

Not only did we receive positive reactions, but also interesting insights from practice.

Based on this data, the trowel is equipped with a **stainless steel blade**, available in **4 different blade thicknesses: 0.3 mm - 0.4 mm - 0.5 mm - 0.7 mm.**

**CARBON  
FIBRE**

**STAIN

# PLASTERER - PURE LEATHER HANDGRIP

This concept consists of a full range of plastering trowels, finishing trowels, plastering spatula's and finishing spatula's for the plasterer.

Ergonomic innovations play a major role within this plasterer concept. The Super Prof Pure COMFORT finishing and plastering trowels are a good example of this. Various stainless steel blade sizes and blade thicknesses are available.

## PLASTERER - SOFT GRIP

The Plasterer concept with the orange-brown softgrip is in line with our successful Pure line; the handtools with the leather handgrip.

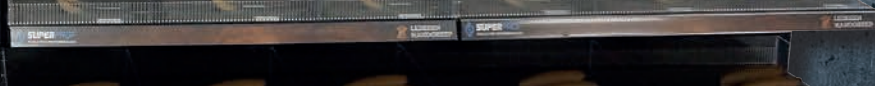

This soft concept consists of a full range of plastering trowels, finishing trowels, plastering spatula's and finishing spatula's for the plasterer. Also the Super Prof Pure COMFORT finishing and plastering trowels can be equipped with an ergonomic soft grip.

# PLASTERER - STORE CONCEPT

Due to our extensive experience with plasterers we can offer you a complete concept possibly adapted to your wishes.

A concept may consist of finishing trowels, plastering trowels, plastering/finishing spatula's, wooden holder, Comfort Profiles and Twisters.

## **Wooden holder**

The Super Prof wooden holder ensures that your spatulas or Comfort Profiles can be stored and transported safely and professionally.

# PLASTERER - STORE CONCEPT

This plasterer store concept makes it even more complete. It is an addition of our extensive trowel range and much more.

Within this plasterer concept you can also find our various floats, planes and several mortar boards.

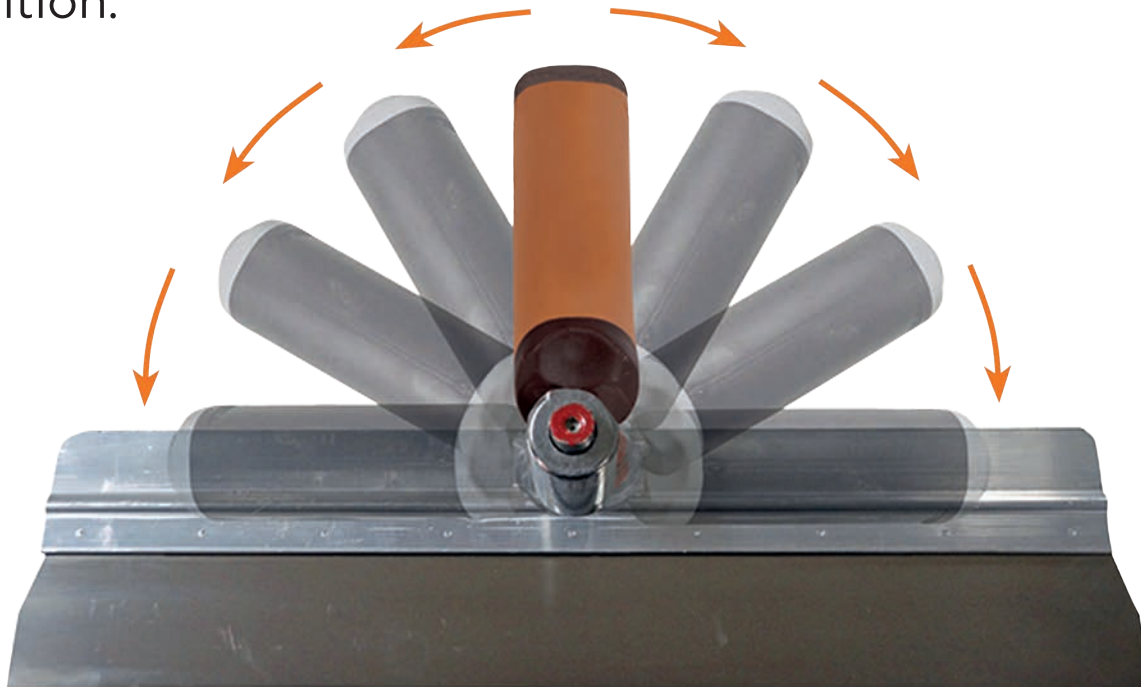

# SUPERPROF

TOOLS FOR PROFESSIONALS

## TWISTER - ROTATING GRIP

The Super Prof **Twister** is equipped with a rotating, ergonomic soft grip, mounted on the profile of the (plastering) spatula. This makes it possible to adjust the grip in any desired way for the optimal, comfortable and natural working position.

# COMFORT PROFILE NEXT

The innovative Comfort Profile Next is an extension to the Comfort Profile serie. The flexible and wider 0,3 millimeter stainless steel blade ensures a super smooth finishing of walls and ceilings.

The Next is equipped with a wide aluminum profile, which ensures better pressure distribution.

Works quickly and with a minimal loss of plaster material. As a result, sanding afterwards is limited to a minimum.

**Blade thickness:** ● 0,3 mm

**Lengths:** 170 - 220 - 280 - 380 - 480 - 570 - 800 - 1000 - 1200 mm

TOOLS FOR PROFESSIONALS

## **Comfort Profiles**

The Comfort Profile and Comfort Profile Next, made from aluminum, are ideal for super smooth finishing of (big) surfaces. With our Multi Click handles and extension pieces it is possible to extend these tools.

## **Straight edge profiles**

This concept contains 5 types of profiles: the floor profile, trapezium profile, trapezoid-shaped profile, the h-profile and double h-profile.

Both of these concepts consists of various lengths.

# BRICK LAYER AND BRICK JOINTER

The fully welded Super Prof brick trowels, such as the Antwerpen, Brussel, Floreffe and Parijs types, are equipped with a Pure leather handle, soft handle or wooden handle.

In collaboration with TNO, Super Prof offers the bricklayer the SMART brick trowel. This brick trowel reduce the pressure on the muscles and nerves. In addition to this innovation, this concept also includes traditional wooden brick trowels, joint trowels, chisels, palettes for jointing and a joint master.

# PUTTY KNIFES AND JOINT KNIFES

Super Prof is constantly thinking about new ideas and developments of professional hand tools, in which ergonomics and quality are paramount. The Super Prof putty knives and joint knives have both been expanded with a super strong renewed version, available in different blade widths.

These are made out of one piece of high quality stainless steel, which is equipped with a stainless steel soft coat handle. Ideal for the plasterer, dry builder, painter and other craftsmen.

# DRYWALLER - STORE CONCEPT

For the Drywaller, Super Prof offers a complete package to install and finish a perfect plaster board.

This includes putty and joint knives, sanding tools, screw-driver bits, trowels, surfacer- and mortar hawk, cutting tools, Pure COMFORT trowels and more usefull products.

UNIVERSAL  
CLICK SYSTEM

## MULTI CLICK

Super Prof Multi Click is a universal click system that makes it easy to exchange various hand tools.

Extending tools by means of extension handles and extension pieces promotes the ergonomic work of professionals on a floor or a wall and ceiling.

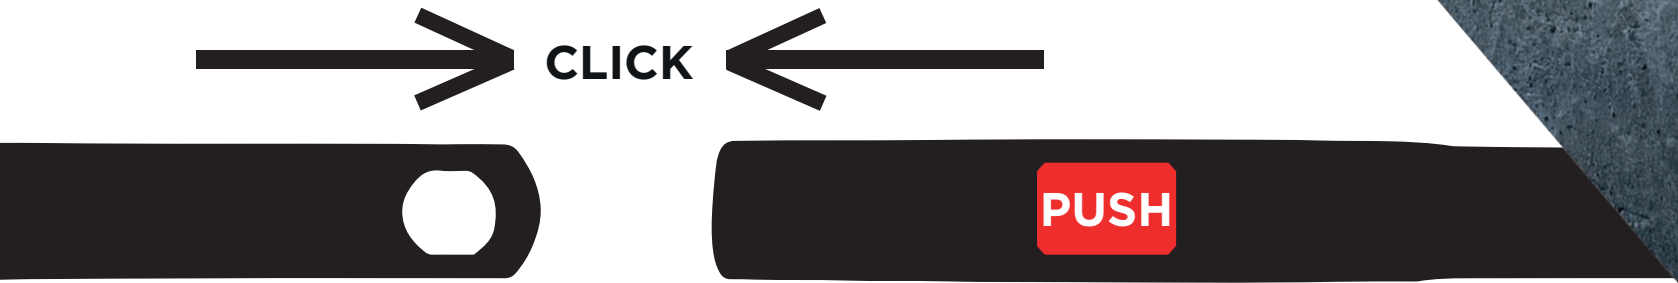

The Multi Click system is integrated into various store concepts for the following target groups: plasterer, floor layer and drywaller.

With the extension handles in combination with extension pieces it is possible to extend the plasterer and finishing spatula's, Comfort Profiles and wall/floor scrapers. The air bleeding spiked rollers, sander, screeds and red aluminium floats can be directly extended with an extension handle.
